Topical Retinoids are still considered the gold standard of anti-ageing ingredients by Dermatologists worldwide. This highly active retinoid cream boosts cell turnover and promotes healthy elastin, resulting in smoother, more resilient skin with fewer fine lines and wrinkles. It also improves exfoliation and product penetration, removing elastosis without causing dry, sensitive, or irritated skin. It contains Amino Acids, Sage Leaf Extract, and Hyaluronic Acid, making it safe and easy to use.

It's an excellent option to improve the signs of ageing and restore photo-damaged skin. It's especially beneficial for individuals with dull, dry, coarse skin with fine lines, ridges, or scar-like structures. This cream is perfect for those who want to boost their cell turnover and promote healthy elastin, resulting in smoother, more resilient skin. Additionally, since it's a safe and easy-to-use cream, it's an excellent choice for anyone who wants to add retinoids to their skincare routine without the risk of dryness or irritation.

Use as part of your evening regime - simply apply the cream all over the skin after cleansing and other suggested serums. And don't forget to use a minimum SPF 50 sunscreen during the day.
